DETAILED ACTION

1. The preliminary amendment filed 30 March 2005 has been entered. Claims 19 – 21 and 24 are canceled; claims 1 – 18 and 22 – 23 are pending.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1 – 5, drawn to pharmaceutical compositions.

Group 2, claim(s) 6 – 18, drawn to methods of protecting cell types of a subject's nervous system.

Group 3, claim(s) 22 – 23, drawn to methods of screening an agent.

3. The inventions listed as Groups 1 – 3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The first claimed technical feature, a pharmaceutical composition comprising "protein S and/or at least one functional variant thereof, wherein the protein S or the functional variant is present in an amount sufficient to provide neuroprotection" is not a contribution over the prior art and thus is not a special technical feature as defined in PCT Rule 13. Griffin et al. (U.S. Patent 5,405,946, issued 11 April 1995, cited on IDS filed 27 April 2005) teach a variant of protein S (see claims) and teach pharmaceutical compositions comprising the variant (see column 12 line 65 – column 13 line 54). The pharmaceutical composition of claim 1 is not a contribution over the prior art and thus is not a special technical feature. Groups 2 – 3 are drawn to different technical features than group 1. The technical feature of group 2 is administration of a protein, and the technical feature of group 3 is a library of candidate agents. Because the technical feature of Group 1 is not a special technical feature and because the technical features of groups 2 – 3 are not present in the

claims of group 1, unity of invention is lacking. Note that PCT Rule 13 does not allow for multiple products or multiple methods in a single application.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
